SERVICES:

Lighting and power, Air Conditioning,

SECTOR:

Industrial

CONTRACT VALUE:

£207k

MAIN CONTRACTOR:

Affleck Electrical

PROJECT DESCRIPTION

This was a new installation of all lighting and power services to Torin-Sifan's new production building. We worked as main contractor on this project, bringing it in on time and to a very satisfactory standard for the customer.

ELECTRICAL SERVICES

- Installed main distribution equipment to supply the new production lines.
- Designed and installed the new production line power and relocated them from another site.
- Designed and installed lighting throughout the site.
- Designed and installed lighting and power to the board room and office locations.
- Looked after the CDM contract for the site whilst the building was worked on.

MECHANICAL SERVICES

- Installation of air conditioning, external lighting, compressor supplies, ambi rad heating and controls and general power.
